

# Grading

The components above will be weighed as follows: 15% Design, 70% Code, 15% Report. While evaluations are not explicitly part of your grade, your project score will be impacted based on them. To keep evaluations fair and anonymous, we will not be releasing how evaluations are factored in nor the final scores calculated after factoring in evaluations.

Extensions cannot be applied on design documents. TAs need enough time to read these design documents to be able to hold design reviews in a timely manner. **Evaluation submission will be factored into extensions.** For instance, if code is submitted on time, report is submitted one hour late, three members submit their evaluations on time, and one member submits their evaluation two days late, the group will require a 2 day extension.
