CS 162 Project 2

Grading

The components above will be weighed as follows: 15% Design, 70% Code, 15% Report. While evaluations are not explicitly part of your grade, your project score will be impacted based on them. To keep evaluations fair and anonymous, we will not be releasing how evaluations are factored in nor the final scores calculated after factoring in evaluations.

Extensions cannot be applied on design documents. TAs need enough time to read these design documents to be able to hold design reviews in a timely manner. **Evaluation submission will be factored into extensions**. Refer to the Course Policy Page for more information.
